Direct drive

Direct-drive high-speed lockstitch sewing machine (with auto-trimmer)

The model design based on the traditional auto-oil lubrication lockstitch sewing machine, collocate the inside micro servo motor as direct transit to instead of the belt transit, improved the transit accurate and avoid the pollution caused by belt crumbs desquamation as the belt abrasion. Adopt the direct-drive way, provided the function of quick start and accurate stop, cost less electricity and saved the energy useful for environment. The traditional auto-oil lubrication insure the machine operation with keeping the low noise and last the use life, the model also has function of auto-trimmer, wiper, reverse seam and stop.
