Left-handed machines A world first for Pegasus

These machines were designed to be used together with normal, right hand machines and incorporated into automatic sewing units in which both edges of an article are seamed simultaneously. Their full power is best seen when performing tw-edged seaming operations on sheets, blankets, towels, etc. Enable tremendous time saving to be realized.

Labor saving devices

Code	Device names	Descriptions
KH	Flat type vacuum chain cutter	A thread chain is cut as soon as it is sucked up by air suction. There is no need to cut the thread chain using scissors. The suction inlet is positioned flush with the needle plate and right behind the presser foot. Thanks to this feature, wide double chainstitch, extra heavy weight or woolen thread chains are smoothly sucked up.
