~	EX5204N-01	1	3	—	3、4、5mm
~	EX5214N-01	2	4	2mm	2、3、4mm

Safety stitch machines

EXN Series

People in the know select Pegasus' wrinkle-free-machine

Shrinkage-free, wrinkle-free and distortion-free products over many types of washing. The permanently shaped operation is now in fashion and totally different from the conventional resigning process performed on fabrics before sewing. This innovative permanently shaped operation is performed directly on sewn products. Then the most important point is the quality of the sewn products. If any puckering is found on sewn products, it will be permanently shaped and cannot be corrected afterwards. This is why sewn products should have the highest quality. Pegasus' EXN Series is the machine to respond to the contemporary needs.

NP Wrinkle-free machine for closing sleeves and sides

When closing sleeves and sides on dress shirts, blouses or similar garments, the safety stitch machine NP Series produces beautiful stitches with no puckering. For plain seaming on lingerie, the overedger NP Series does the same. In addition, even on slippery fabrics, these Series do an outstanding job with no plyshift, thus obtaining quality products.

NS Wrinkle-free-machine specified for setting sleeves

Skilled workers conventionally have to perform stretch seaming to set sleeves on dress shirts or blouses. However, setting sleeves becomes as easy as plain seaming for unskilled workers using these Wrinkle-free-machines. Allows operators to set sleeves neatly with no wrinkles and plyshift, thus enhancing the quality of sewn products.
