

FW720T-EWT FW720T-EST

SMALL CYLINDER BED COVERING STITCH MACHINE WITH THREAD TRIMMER (MINI SERVO MOTOR)

Feature:

The patented structure provides stable cutting and easy maintenance. The special design under trimmer plunger, to micro-adjust the length of blade precisely when it cutting.

The first design, patent awarded "Direct Driving Under Shaft Connecting Type" mini servo motor which could offer you easy to installation, more sensitive, more silence and precisely needle position detection. The machine head wouldn't swing when it begin sewing & stop.

- First, To develop the patent of "Direct Driving Type" presser foot lefter. It's going to more sensitive and silent.
- "Horn Type" Regulating fabric guider, to offer stable covering stitch.
- Adjustable hemming folder, it's easily to change the hemming function.
To use "Sealed Type" side cover, to solve the side cover leaking problem. In
- additional, the special short cylinder designed which the distance between side cover to presser foot is 35mm to offer smoothly operation.
- The small cylinder designed which circumference are 182mm, to sew small-sized tubular goods more conveniently.
- The patented looper thread take-up put on the front of body, to clean the winding and adjustment easily. The flexible thread take-up eyelet holder, to offer the looper thread tension and release more details adjustment.
- The patented "Regulating Lever Type" differential feeding mechanism, which could offer you the full differential feeding.
- The micro stitch length-regulating lever, which could adjust the stitch length easily.
- The "One Piece Type" front cover, it's easy to for you assemble and maintenance.
