Application: Widely used in print, plastic, chemistry, ceramic, leather, craft, advertising industries.

Product info

Order No.:20201

This newly updated PANTONE formula guide gives user more convenience and practicality. The sector-formula design and the broader color layout make color selection easy and convenient. Besides the PMS (PANTONE MATCHING SYSTEM) colors, this PANTONE formula guide also contains 147 new special colors and 14 basic metallic colors. Printing ink mixing formula is also provided.

Every color in this PANTONE formula guide has its exclusive serial number, for example, you may see Pantone i°396Ci±, that just stands for an exclusive color different from all the other colors. That makes the color identification correct and easy.

Due to its professional design, good practicality and abundant color collections, this PANTONE formula guide is widely used in textile, dyeing, knitting, plastic, bag making, shoe making, chemistry, ceramic, craft and other related industries.

Features:

- 1114 professional PANTONE colors including 14 basic colors.
- Mill-finished coated/uncoated paper.
- Sector-format design makes color selection convenient and easy.
- Ink formula shows by PCS and/or percentage (%).
- Exclusive PANTONE serial numbers for color identification.
- Abundant color collections make the color checking correct and convenient.
